

2 Way Relay LED Light Switch 220V 50/60Hz RF Remote Control Digital Wireless Remote Control Switch for Ceiling LED Lamp Bulb

Function:

1. A/1 will light after power on.
2. A/1 uses to turn on /off the blue group, B/2 uses to turn on /off the green group, "ON"/"OFF" means turn on/off the whole item.
3. Manual lighting sequence (wall switch control): A / 1 , B / 2 ,the whole circuit will be turned on.

Specification:

Product material: ABS plastic

Installation method: Wiring

Input voltage: AC 200 -245V (50/60Hz)

Channel load:

Incandescent lamp≤600

Energy-saving lamp≤150W, Energy-saving lamp≤6

H tube≤280W, H tube≤5pcs

LED≤50W, LED < 5pcs

Relay current 7A, remote control of lamps, suitable for lighting products

Working temperature: -20 -60°C

Size:

Remote control: 11m*4.5cm*1.5cm;

Relay: 6.0cmx4.5cmx2.6cm

Remote control type

Remote control distance:

Radio frequency remote control; the frequency is 315MHz, and the wireless signal can pass through the wall.

About 8-15 meters indoors, about 20 meters in open areas (depending on the specific use environment).

Application:

Ceiling lamp, incandescent lamp, energy-saving lamp, fluorescent lamp, crystal lamp, pendant lamp, LED lamp, etc., suitable for home, stairs, aisle, corridor, bathroom, warehouse, garage, factory, workshop lighting, etc.

Package Included:

1 * 2 Way Receiver

1 * RF Remote Control
